Promar Lobster & Crab Accessories

New for the 2008-09 Lobster Season, Promar introduces 2 new crustacean catching essentials. The innovative AC-300X Bait Suspender and LED Battery-Powered Reusable Waterproof Light Sticks.

Bait Suspender AC-300X
Catch more lobsters with the classic ringed hoop nets than ever before. This tricked out new bait cage outsmarts the average crustacean by drawing them into the center of the hoop net. Lobsters and crabs can no longer sneak a free meal by feeding off the edges of a drifting bait ring. Bait Suspenders center the bait cage directly in the bull's eye of the hoop net by way of some slick rigging. The new vinyl-coated steel bait cage utilizes swivels to spin, sending any free loading crustaceans back to the bottom of the hoop net. Still have bait at the end of the night? No need for messy zip ties. Bait Suspenders can easily detach and reattach by way of stainless clips included in the rigging. Bait Suspenders include: quality vinyl-coated steel wire bait cage, two high grade stainless steel clips for attaching to hoop ring, swivel snaps, and rigging. Bait Suspenders come rigged to fit the standard 32" hoop nets (NE-102) but can be easily modified to fit the larger 36" diameter models (NE-102J, NE-102JPRO).

LED Battery-Powered Light Sticks
A bright new idea from Promar - pun intended! The new Promar LED Glow Light Stick pack big value! They're waterproof, reusable, chemical free, battery replaceable, and come with 2 full sets of batteries. The LED light and batteries are housed in a 5" glow-in-the-dark casing. Perfect for illuminating your floats, boats, and kayaks. They're also great for night time and predawn fishing. An absolute must for the avid hooper! Promar's new LED light sticks are available in two models, GS-260B (Blue) or GS-260W (White).

AC-300X (illustrated in red for demo)

GS-260B Model

Ultrahead Shaky Type 5151 jig head, featuring Owners TwistLOCK® Centering-Pin Spring (CPS - patent pending) molded into the lead is the ultimate Shaky head. Small diameter finesse baits can be easily secured by inserting the pin in the center of the nose of the soft plastic, then screwed onto the TwistLOCK® coil spring to rig perfectly every time! Ideal for weedless-style Texas Rig'N, and on the bottom, the contoured jig head rocks forward to present bait in a tantalizing nose-down and tail up position. Round bend, light wire hook has a 45° cross eye, wide gap, Super Needle Point and a black chrome finish. Heads available in Green Pumpkin, Brown, and Natural colors.

Kevin VanDam Lends a Hand

Kevin VanDam is one of the most decorated anglers in history. As a two-time Bassmaster Classic Champion, three time recipient of the B.A.S.S. Angler of the Year award; Kevin understands tackle organization is key to his success. Kevin lends his expertise, helping Plano® design the perfect tackle bag. Taking everything Kevin wanted in a bag; Plano® created the new Kevin VanDam Signature Series bags for Plano®'s new flagship product line, the Guide Elite™ Series.

The 4880 KVD Signature Series XL Gear Bag features an extra large main compartment for storage of even your biggest gear. The 4880 KVD Signature Series XL Gear Bag is constructed of easy to clean weather resistant fabrics and features 6 zippered pockets and 11 mesh pockets. Both the front and back of the bag open to provide easy access to all your gear stored inside. Two bags in one, the 4880 KVD Signature Series XL Gear Bag comes with a removable zippered weather-resistant take-along bag that stows in the front pocket. To help keep moisture out the 4880 KVD Signature Series XL Gear Bag is fitted with a molded water-proof non-slip base and weather-resistant zippers. The 4880 KVD Signature Series Gear Bag measures 27" L x 15.5" W x 15.75" H.

The 4870 KVD Signature Series Bag packs all of the features of the 4880 into a more compact size, then goes a step further by including four 3700 Series StowAway® utility boxes. The 4870 KVD Signature Series Bag measures 22.75" L x 12" W x 12" H.

For more information about either of the new KVD Signature Series Bags, or any other Plano® Tackle Systems products, please contact Douglas Riewski at driewski@planomolding.com. Feel free to view our entire line at www.planomolding.com.

Calstar proudly presents the all new GG Series.

The all new GG Series from Calstar incorporates the advantages of glass and graphite, giving anglers the best of both worlds. This perfect blend of glass and graphite give it action and strength, all with less weight. The GG has no exposed graphite on the outside. The last strip of material on the GG is a solid (the length of the rod) strip of glass. This makes it lighter and stronger than glass rods, yet it casts with the feel of a glass rod. It's no surprise that this new innovation comes from Calstar, a leader in the rod world for a long time.

The GG comes in 6 models. There are four 7 footers and two in the 9 foot length. Anglers will find that the 7ft GG models will work great for all your local live bait action on up to 5 day trips. The soft glass tip and lightweight make fishing the smaller live baits a cinch. The 9 ft models have a nice tip for casting jigs. It doesn't "line drive" a jig like some of the other graphite jig sticks on the market and it shuts down real good, which is what you want when you hook into a real fish.

For more information on the new GG series or any other of the fine Calstar rods please contact Tackle Specialties at (310) 538-0535.

CALSTAR
STATE OF THE ART

Vallarta "Padded" Boardshort

The newest Fishworks product was the real eye-opener at this years 2008 ICAST show. Like the Angler Walkshort, the "Vallarta" Boardshort is equipped with an EVA removable fighting pad that can be slid into one of the two thigh pockets, eliminating the need for a rod belt. This comfortable fitting boardshort is comprised of: sueded microfiber, a drawstring zip-fly, two custom 3 Fish embroidered side plier pockets and back pocket. These original boardshorts are the first of its kind and are giving anglers a new perspective on big game fishing. There's no need to scramble for a rod belt after getting hooked up since the pad sits inside the shorts in a way that anglers barely realize it's there.
