

FRED HALL'S 2008 FISHING TACKLE AND BOAT SHOW

Vintage Offshore Tackle booth will feature the oldies but goodies

Saltwater fishermen and tackle collectors should not miss the opportunity to take a stroll down memory lane at the Vintage Offshore Tackle booth in the arena area near the main entrance.

Fishermen who relied on Penn Reels will especially appreciate the extensive selection of mint, in-the-box vintage Penn reels. Also available for sale are Newell/Penn Special reels and components, Accurate and Tiburon Penn conversions and components, Penn Senators size 1/0 through 16/0, Truline and Sabre Rods, bone jigs, Hetzels, Baldy's, Schnabels, Candy Bars, lift poles and picks, harpoon darts, old photos, books and a huge inventory of pre-owned, ready to fish rods, reels and lures including Seeker, Calstar, Penn, Newell, Salas, Tady, Braid and Zuker.

Freshwater fishermen will enjoy the collection of wooden Creek Chub Pikies and Heddon River Runts, many in their original boxes. Stop by and take home a piece of American fishing history. For more information, call Randy at (805) 748-9202 before, during or after the show.

The latest from Promar and Ahi USA featured on display at Fred Hall

PROMAR AND AHI USA will be showing off the latest in lobster and squid fishing gear at the upcoming Long Beach Fred Hall Show.

Promar and Ahi USA continue to flex their innovative muscles as they show off the latest in lobster

and squid fishing gear at the upcoming Fred Hall Show. The 30-foot long booth will also fea-

ture the latest in fish landing nets, sabiki sticks, cast nets and much more.

The Promar Eclipse hoop net exploded onto the scene last year with its revolutionary design and proven ability to catch more lobsters and crabs than ever before. This year Promar introduced a turnkey rigging kit for the Eclipse net, the NE-103EK Eclipse Hoop Kit. Each rigging kit comes with everything you need to dial in an Eclipse hoop net: four-arm bridle harness, bridle float, 100 feet of braided rope, and a commercial-sized surface buoy.

Put more bugs in the bag with Promar's new Bait Suspender baiting system! It really works! The Bait Suspender increases the effectiveness of the classic standard-ringed hoop nets. Lobsters and crabs can no longer sneak a free meal by feeding on the edge of a drifting bait ring. Included with each Bait Suspender are two stainless steel clips, rigging, swivel snaps, and quality vinyl coated steel bait cage.

Promar's ProMesh Series of snag-resistant landing nets are making a huge impression on both fresh and saltwater anglers. The new generation of ProMesh netting is snag resistant, lightweight and easy on the fish. All three models boast heavy-duty anodized aluminum telescopic handles. ProMesh Series nets come in three sizes and are a must for bass and trout anglers.

Ahi USA's new weighted jumbo squid jig is incredibly effective for tackling the giant squirts. Nine inches long and weighing in at 14 ounces, this jig was designed with the upper 200 feet of water in mind. Luminous glow, three rows of corrosion-resistant razor sharp hooks, and strategically positioned weight for rapid descent make this one of the hottest squid jigs available.

Fred Hall Show Giveaway: purchase more than \$20 worth of Promar or Ahi USA products at the show and receive a free beanie or hat. Purchase an AHI USA Sabiki Stick at the Fred Hall Show and receive two free Sabiki bait rigs. Bring your receipt to the Promar and Ahi USA booth to redeem. Limit one hat per customer.

For more information about these and many other Promar and Ahi USA products, visit www.AmericanMaple.com, or call (866) 264-1562.
